

Large Canadian Remand Center Achieves
Operational Efficiency
and Enhanced Security with IPFusion's
Comprehensive Solution

CASE STUDY

Innovation in the
Pursuit of Simplicity

Background

One of Canada's largest remand centers, housing close to 2000 accused individuals, faced the challenge of managing a complex operational system. This system comprised an extensive network of doors, cameras, intercoms, utility controls, and alarm points spread across over 40 areas within the facility. The need for a comprehensive integrated solution led them to IPFusion.

Implementation

IPFusion provided a solution offering 24/7 command, awareness, and control through a tailored dashboard. This approach facilitated a streamlined, efficient, and secure environment for the center. Sixty touchscreen workstations were configured and deployed, enabling sub-second monitoring and control across the facility.

Outcome

With IPFusion's solution, the remand center benefited from reduced complexity, streamlined training processes, and increased awareness and control. The staff gained the ability to coordinate and manage real-time incident responses, thereby enhancing safety for personnel, the public, and the inmates.

Advantages

IPFusion's innovative approach and all-encompassing solution have made a significant impact in optimizing the operations of this remand center.

System Components:

- 60 Workstations
- 4 Servers
- 114 Maps

System Integrations:

- 2100+ Doors
- 1500 Cameras
- 3100+ Intercoms
- 70+ Paging Zones
- 650+ Utility Controls
- 1750+ Lighting Points
- 400+ Custom Alarm Points

Conclusion

This case study showcases the transformative potential of IPFusion's integrated solutions in a high-security, complex environment. If you're seeking a more efficient and secure operational environment, get in touch with us to discover how IPFusion can provide a solution to your specific needs.
